Profile

Systems Engineer and Business Administrator with 2+ years in Australian ICT roles and earlier experience as a backend and web developer. I analyse business processes and turn them into practical technology — ERP and CRM integration, performance dashboards, cloud and Google Workspace administration, and reliable day-to-day IT operations. Master's degree in Software Engineering & Cloud Computing (Torrens University Australia). I bridge technical teams and business stakeholders to deliver efficient, scalable and cost-effective outcomes.

Experience

ICT Solutions Analyst
Jun 2025 – Present

Clad Craft Pty Ltd · Chirnside Park, VIC · Part-time

- Drive the company's digital transformation by analysing business processes and implementing ICT solutions that improve efficiency and data accuracy.
- Integrate ERP and CRM systems to connect operations, sales and reporting.
- Develop performance dashboards that give management data-driven insights.
- Coordinate with ICT vendors and recommend technology improvements.

IT Systems & Operations Coordinator
Oct 2023 – Jun 2025

Avant Engineering Pty Ltd · Point Cook, VIC · Part-time

- Managed and optimised IT infrastructure across servers, cloud systems and hybrid work environments.
- Applied updates and security patches; troubleshot technical issues for office and field teams.
- Administered Google Workspace, including users and access; used Google Earth for project planning and tracking.
- Maintained the corporate website for uptime, security and accurate content.

Backend Junior Developer
Jul 2019 – Oct 2019

Bluecell · Bogotá, Colombia · Full-time

- Developed backend services on Amazon Web Services and built APIs consumed by voice through an Amazon Alexa skill (JavaScript, Node.js).

Web Developer
Jan 2019 – Jul 2019

Merck S.A. · Bogotá, Colombia · Full-time

- Backend development of new digital projects and maintenance of web applications in Drupal CMS; implemented analytics tracking.
- Provided technical support and monitored server performance for digital initiatives.

Earlier experience
2014 – 2017

- **Engineering, Administrative & Construction Assistant**, ECOCIV, Bogotá (2014–2017): technical drawing for environmental projects, materials logistics, environmental audit support.
- **Business Administration**, Fundación Liberate, Bogotá (2017): workplace wellness training, patient admission records, workplace health & safety.

Projects
